Interactive PDF form

This example form shows the various data fields available in the PDF format

Radio Button:

A radio button or option button is a graphical control element that allows the user to choose only one of a predefined set of mutually exclusive options. Radio button is often arranged in a group of at least two options.

One   Two   Three   Four

Check Box:

A check box is a graphical widget that permits the user to make a one or multiple choices. The user may select several of the choices. Contrasting is a radio button, in which only a single option is selectable from several mutually exclusive choices.

CPP   C#   Java   JS

Text Field:

A text field allows users to input variable information on PDF files. All text fields can be set to specific formatting (e.g., number, date, percentage, time, special and custom). Text field is used to insert single or multiple lines of text and can be made to scroll.

Single Line Text Field:

Multiple Lines Text Field:

Combo Box:

A combo box is a commonly used graphical user interface widget. Traditionally, it is a combination of a drop-down list or list box and a single line editable text box, allowing the user to either type a value directly or select a value from the list.

List Box:

A list box is a graphical control element that allows the user to select one or more items from a list contained within a static, multiple line text box.
